

the "Mama" deerhandler™

PRODUCT #DHM8679

Pictured is the patented left hand "Mama" deerhandler™ chute. The "Mama" is the original chute to have our famous backpress, our kick-panel protector and our built-in palpation cage. It's also the chute that allowed us to perfect and enhance the deerhandler™ chute concept. The "Mama" is perfect for the following tasks: Al'ing, Tagging, Tattooing, TB Testing, Cutting or Scoring of Antlers, Hoof Trimming, Ultra-sounding Does, DNA Sampling, and Administering Medications.

- ◆ Opens fully for accessing approximately 75% of the deer's body
- ◆ Upper half has sliding doors on both sides
- ◆ A bottom door on one side for accessing legs
- ◆ Side trip and lift floor lever or trip floor cable are all on operating side
- ◆ New improved manual headgate makes headman's job much easier
- ◆ One side of cradle swings open for gentle release of the deer
- ◆ Shoulder stops keep deer from escaping when headgate opens
- ◆ Creep-proof chute entrance
- ◆ Ceiling mounted backpress securely holds deer down in cradle
- ◆ Full width rubber covered drop-floor with flip up panel kick protector
- ◆ Available in right or left hand models. (The model is determined by following the deer into the chute and if the controls are on the left, it's a left hand, and if they're on the right, it's a right hand.)

Specifications:

- ◆ Weight = 850 lbs
- ◆ Length = 117" open & 87" closed
- ◆ Width = 29" ISM & 36" OSM
- ◆ Height = 77" closed & 79" open
